LONDON DIGITAL PATHOLOGY

Source Pathology Services and LDPATH Ltd join forces for market leading end to end cellular and digital pathology services to provide:

- The largest and most technically advanced private provider of cellular and digital pathology services in the UK.
- Focus on a unified service from first patient contact to molecular diagnostic testing.
- Digital diagnostic pathways, leading to faster diagnosis and helping clear backlog of elective surgeries as a result of the pandemic.
- A roadmap for incorporating artificial intelligence (AI) to reimagine pathology services.
